Meteorological and Geoastrophysical Abstracts is a monthly publication presenting, in English, current meteorological and geoastrophysical abstracts gleaned from foreign and domestic literature.

Meteorological & Geoastrophysical Abstracts

Publication Office

American Meteorological Society
45 Beacon Street, Boston, MA. 02108

Editorial Office

P.O. Box 1736
Washington, D.C. 20013
Telephone: (202) 546-6734

Address all business communications, orders, and inquiries to the Executive Director, American Meteorological Society, 45 Beacon Street, Boston, MA. 02108. Exchanges and reprints may be sent directly to P.O. Box 1736, Washington, D.C. 20013.

Subscription Rates

Government agencies and industrial, commercial, scientific, and research organizations, $400.00. Educational institutions and public libraries, $200.00. Back volumes: Vols. 16–29 (1965–1978), same as above. Vols. 1–15 (1950–1964), $50.00 per vol.; $10.00 per issue. Special price, Vols. 1–10 (1950–1959), complete set, $200.00. Add $10.00 per volume for subscriptions outside U.S.

Cumulative Author, Subject, and Geographic Indexes
(Vol. 30, Nos. 1–12, 1979)

June 1980

Published by the American Meteorological Society at 45 Beacon Street,
Boston, MA 02108. Second-class postage paid at Boston, MA and
at additional mailing offices.

ERRATA

Volume 30, 1979

30.1 –82	Author: *change* "Ivanykin, E. E." to "Ivanykin, Ye. Ye."
30.1 –225	Author: *change* "McKensie, J. F." to "McKenzie, J. F."
30.1 –352	Title: *change* "Barometertiefststand" to "Barometertiefstand."
30.1 –398	Author: *change* "Strickler, Han" to "Stricker, Han."
30.1 –500	Author: *change* "Radinovich, Yu. I." to "Rabinovich, Yu. I."
30.1 –504	Title: *change* "venery" to "Venery."
30.1 –523	Subject Heading: *change* "Charges particle" to "Charged particle."
30.1 –549	Author: *change* "Khokhlov, G. L." to "Khokhlov, G. P."
30.2 –17	Serial note: *change* "1975" to "1978."
30.2 –183	Author: *change* "Mulhearn, R. J." to "Mulhearn, P. J."
30.2 –286	Serial note: *change* "1975" to "1978."
30.2 –310	Serial note: *change* "1975" to "1978."
30.2 –422	Title: *change* "vltavě v praze" to "Vltavě v Praze" and "klementinu" to "Klementinu."
30.2 –494	Author: *change* "Livingstone, W. C." to "Livingston, W. C."
30.2 –517	Author: *change* "Panayotov, Todar" to "Panayotov, Todor."
30.2 –554	Title: *change* "Stroyeniyei" to "Stroyeniye i."
30.2 –594	Serial note: *change* "1975" to "1978."
30.3 –30	Corporate author: *change* "Seccíon" to "Sección."
30.3 –62	Author: *change* "Kófalvy, Jenö" to Köfalvi, Jenö."
30.3 –69	Title: *change* "ido"jarasanak" to "időjárásának."
30.3 –109	Corporate author: *change* "d'Hygiéne" to "d'Hygiène."
30.3 –159	Author: *change* "Kolesnik, V. G." to "Kolesnik, A. G."
30.3 –224	Subject Heading: *change* "Barolinic waves" to "Baroclinic waves."
30.3 –428	Author: *change* "Atjay, Agnes" to Ajtay, Agnes."
30.3 –460	Title: *change* "okloraketnoy" to "okoloraketnoy."
30.3 –468	Title: *change* "tsiklotronnoy" to "tsiklotronnoy."
30.3 –595	Title: *change* "off the west coast or Ireland" to "off the west coast of Ireland."
30.4 –69	Title: *change* "Argos" to "ARGOS."
30.4 –130	Title: *change* "Időjárásának" to "időjárásának" and "finemfelbontású" to "finomfelbontású."
30.4 –177	Title translation: *change* "Myrnyy" to "Mirnyy."
30.4 –300	Title: *change* "osbeshchennost' " to "osveshchennost'."
30.5 –24	Author: *change* "Passi, Rankit M." to "Passi, Ranjit M."
30.5 –238	Author: *change* "Catsoulis, B. D." to "Katsoulis, B. D."
30.5 –318	Title: *change* "Kontakzone" to "Kontaktzone."
30.5 –325	Author: *change* "Hurtalova, Tatjana" to "Hurtalová, Tatjana."
30.5 –375	Author: *change* "Lund, Ever A." to "Lund, Iver A."
30.5 –469	Author: *change* "Német, Erika" to "Németh, Erika."
	Title translation and abstract: *change* "Carpow" to "Karpov."
30.6 –124	Title translation: *change* "balance" to "an accounting."
30.6 –134	Author: *change* "Mohnin, Volker A." to "Mohnen, Volker A"
30.6 –240	Title: *change* "nara" to "para."
30.6 –345	Collation: *change* "Czechoslovakian" to "Slovak."
30.6 –446	Author: *change* "Krasnopolsky, V. A." to "Krasnopol'skiy, V. A."
30.6 –454	Author: *change* "Feldstein, Y. I." to "Fel'dshteyn, Ya. I."
30.6 –468	Author: *change* "Nestrov, G. T." to "Nesterov, G. T."
30.7 –344	Author: *change* "Tselepidaki, H. G." to "Tselepidakis, H. G."
30.7 –379	Corporate author and title translation: *change* "Centro de Pesquias" to "Centro de Pesquisas."
30.7 –540	Subject Heading: *change* "Quarternary" to "Quaternary."
30.8 –10	Abstract note: *change* "30.5–15" to "30.5–14."
30.8 –11	Author: *change* "Escardo, Alberto Lines" to "Escardó, Alberto Lines."
30.8 –256	Author: *change* "Fyodorova, N. I." to "Fedorova, N. I."
30.8 –361	Title translation: *change* "terraine" to "terrain."
30.8 –388	Author: *change* "Pauke, Horst" to "Paucke, Horst."
30.9 –50	Author: *change* "Wang, Ting-I" to "Wang, Ting-i."

ERRATA

(*Continued from page ii*)

30.9 –190	Author: *change* “Novozhilov, V. I.” to “Novozhilov, N. I.”
30.9 –360	Author: *change* “Olory-Togbe, Paul” to “Olory-Togbé, Paul.”
30.9 –597	Title translation: *change* “greater waters of eastern Venezuela” to “surface waters off Venezuela.”
30.10–23	Author: *change* “Passi, Panjit M.” to “Passi, Ranjit M.”
30.10–291	Author: *change* “Braumer, H.” to “Baumer, H.”
30.10–324	Author: *change* “Yamada, Tomoni” to “Yamada, Tomomi.”
30.10–384	Author: *change* “Fel’dsteyn, Ya I.” to Fel’dshteyn, Ya. I.”
30.11–4	Corporate author: *change* “Über” to “über.”
30.11–53	Title: *change* “R. V. Meteor” to “R/V *Meteor*.”
30.11–202	Author: *change* “Standiforth, Andrew” to “Staniforth, Andrew.”
30.11–259	Title translation: *change* “Mirnyy area” to “Mirnyy Observatory area.”
30.12–70	Title: *change* “total rate on ion formation” to “total rate of ion formation.”
30.12–210	Title translation: *change* “Comparison between” to “Comparison of.”
30.12–315	Title translation: *change* “Passo Rolle” to “Rolle Pass.”
30.12–400	Author: *change* “Fahelson, U.” to “Fahleson, U.”
30.12–447	Author: *change* “Katchurin, L. G.” to “Kachurin, L. G.”
30.12–469	Authors: *change* “Katchurin, L. G.” to “Kachurin, L. G.” and “Medalyiyev, C.” to “Medaliyev, Kh.”
30.12–476	Title: *change* “Veneras” to “Venera.”
30.12–546	Corporate author: *change* “Oceans” to “Océans.”

AUTHOR INDEX

Note: In this index, author entries are arranged alphabetically and, under each author, titles are arranged alphabetically by the first word (excluding articles) of the original title. Translated titles are placed in brackets after foreign language titles. Authors whose names begin with an article or preposition (de, di, le, la, van, etc.) are generally indexed under that article or preposition. Cross references indicate variations from that practice, or possible alernate entries. Multiple-author titles are listed under the first author and the coauthors are entered after the title.

A

Aagaard, Knut, *see* **Carmack, E. C.,** 30.2–564
Aalto, Jukka
  Finite-element aquifer model which takes into account elevation changes of the aquifer, 30.4–538
Aarsnes, K., *see* **Lundblad, J. Å.,** 30.10–241
Abal'yan, T. S.
  O raschete gidrografa stoka gornoy reki [Calculation of the runoff hydrograph of a mountain river], 30.4–459
Abatut, J. L.
  Analysis and design of a field of heliostats for a solar power plant (*with* **Achaibou, A.**), 30.3–242
Abbas, Mian M.
  New inversion method for remote sounding of planetary atmospheres, 30.12–474
  Stratospheric ozone measurement with an infrared heterodyne spectrometer (*with others*), 30.8–213
  Stratospheric sounding by infrared heterodyne spectroscopy (*with others*), 30.10–134
Abbey, Robert F., Jr.
  NRC's research program in severe phenomena (*with* **Harbour, J.**), 30.11–240
Abbi, S. D. S., *see* **Srivastava, K. K.,** 30.2–363

Peterson, E. W. et al., 30.7–293
Raithby, G. D. et al., 30.3–312
Taylor, P. A., 30.11–201
Airflow over oceans
Cadet, D. et al., 30.2–236; 30.2–324
Rao, G. V. et al., 30.1–367
Airflow over snow cover
Kobayashi, S. et al., 30.7–292
Airflow over vegetation
Wilson, N. R. et al., 30.6–220
Airflow over water waves
Makin, V. K., 30.10–271
Taylor, P. A. et al., 30.2–182; 30.11–301
Airflow through valleys

Kurbatkin, V. P., 30.8–379

Airflow within crop canopies
Shaw, R. H. et al., 30.6–282

Airglow–thermospheric relationships
Noxon, J. F. et al., 30.9–194

Airplane atmospheric composition measurements
Gauntner, D. J. et al., 30.7–84

Airplane clear air turbulence investigations
Dutton, M. J. O., 30.6–116

Airplane instrumentation
Duncan, T. M. et al., 30.1–76

Airplane meteorological research
Duncan, T. M. et al., 30.1–76

Airplane nuclei counters
Nyland, T. W., 30.11–78

Airplane observation data processing
Brown, W. J., 30.11–62

Airplane observation of aerosols
Varley, D. J., 30.8–174

Airplane observation of atmospheric pollution
Blumenthal, D. L. et al., 30.1–101

Airplane observation of clouds
Hallett, J. et al., 30.1–399

Airplane observation of low-level jet stream
Hart, J. E. et al., 30.3–342

Airplane observation of night airglow
Kieffaber, L. M. et al., 30.2–263

Airplane observation of ozone
Anlauf, K. G. et al., 30.4–166
Briehl, D. et al., 30.11–169
Nastrom, G. D., 30.11–155

Airplane observation of solar eclipses
Léna, P. et al., 30.9–546

Airplane soundings
Breed, D. W., 30.9–239; 30.9–240
Moores, W. H. et al., 30.9–153

Airplane turbulence observations
Chellappa, R. et al., 30.2–316
Druilhet, A. et al., 30.3–311

Airplane wake turbulence
Weber, F., 30.7–295

Airplane wake vortex
Weber, F., 30.7–295

Airport atmospheric pollution
Daley, P. S. et al., 30.7–106
Smith, D. G. et al., 30.7–137

Airport meteorological data
Blake, W. J., 30.1–17

Airport meteorological equipment
Bradley, J. T. et al., 30.9–87
Vaisala News [Helsinki], 30.10–69

Airport runway visual range
Hering, W. S. et al., 30.4–511

Airport wind conditions
Chen, T. Y. et al., 30.7–307
Silversides, R. H., 30.1–368

Airport wind forecasting
Marsden, R. G., 30.11–90

Aitken nuclei
Ayers, G. P. et al., 30.9–132

United States National Oceanic and Atmospheric Administration. Pacific Marine Environmental Lab., Seattle, WA., 30.11–14

Collected weather modification papers
United States Senate. Committee on Commerce, Science, and Transportation, Wash., D.C., 30.12–103

Collected works
Annual Review of Earth and Planetary Sciences, 30.2–482
Bogorodskiy, V. V. (ed.) et al., 30.7–517
Congressional Quarterly, Inc., 30.11–8
Levine, J. S. (ed.) et al., 30.4–2
McWhinnie, M. A. (ed.), 30.2–6
Miyake, Y., 30.7–89
National Research Council, Wash., D.C. Panel on Water and Climate, 30.2–439
Orians, G. H. (ed.) et al., 30.4–495
Portney, P. R. (ed.), 30.12–9
Smith, V. L. (ed.), 30.9–1
World Data Center-A, for Glaciology [Snow and Ice], Boulder, CO., 30.12–540

Color of Earth shine
Young, L. B., 30.1–503

Color of seawater
Deschamps, Pierre-Yves et al., 30.4–569
Monahan, E. C. et al., 30.3–595
Sørenson, B. M., 30.4–570
Viollier, M., 30.6–538

Combustion air effects
Homolya, J. B. et al., 30.3–124

Comet ionization
Ip, W.-H., 30.6–452

Comet tails
Ip, W.-H., 30.6–452

Cometary atmospheres
Ashihara, O., 30.2–492
Ip, W.-H., 30.6–452

Cometary dust in upper atmosphere
Butler, E. J. et al., 30.7–412

Comfort climate
Ayoade, J. O., 30.5–434
De Freitas, C. R., 30.6–377
Lutelman-Łanczont, Maria, 30.4–334
Sakhsamanoglou, Kh. S., 30.11–312
Winterling, G. A., 30.10–367

Comfort criteria
Steadman, R. G., 30.11–388; 30.11–389

Comfort indexes
Harlfinger, O., 30.5–441

Comfort zones
Ayoade, J. O., 30.5–434

Commission meetings
United States Federal Aviation Administration, Wash., D.C., 30.12–10

Compendium of meteorology
Wiin-Nielsen, Aksel (ed.), 30.6–26; 30.11–15

Compound haloes
Kanarek, J., 30.8–454

Computer models
Ireland, P. J. et al., 30.9–274

Condensation nuclei counters
Nyland, T. W., 30.11–78
Rosen, J. M. et al., 30.2–374

Condensation nuclei measurement techniques
Naruse, H., 30.4–403

Condensation nuclei measurements
Cadle, R. D. et al., 30.9–426
Gauntner, D. J. et al., 30.7–84
Rosen, J. M. et al., 30.2–374
Shives, F. G. et al., 30.12–275

Condensation nuclei variations
Schmidt, M., 30.9–427

Condensation of water vapor
Mirabel, P. et al., 30.6–314

Condensation processes
Redelsperger, J. L. et al., 30.6–308
Sundqvist, H., 30.1–401

Condensation theories
Clark, T. L. et al., 30.8–393

Conditional Instability of the Second Kind (CISK)
Davies, H. C., 30.9–228
Stevens, D. E. et al., 30.2–215
Yamasaki, M., 30.12–184

Confined aquifers
- Gerber, R. G., 30.6–498

Constant level balloon flights
- Mills, G. A., 30.6–72
- Morel, P. et al., 30.4–69

Constant level balloon trajectories
- Cadet, D. et al., 30.2–324; 30.4–68
- Julian, P. et al., 30.5–40

Constant level balloons
- Ovarlez, J. et al., 30.1–89

Continental shelf circulation
- Barans, C. A. et al., 30.10–573
- Garrett, C., 30.6–584
- Johnson, D. R. et al., 30.10–562
- Malan, O. G. et al., 30.11–589
- Pearce, A. F. et al., 30.3–596

Continental shelf waters
- Houghton, R. W. et al., 30.6–586
- Lee, T. N. et al., 30.7–288
- Pingree, R. D. et al., 30.2–562

Continental shelf waves
- Brooks, D. A., 30.10–567
- Chao, Shenn-Yu et al., 30.12–597
- Helbig, J., 30.11–575

Continental slope
- McGregor, B. A., 30.8–533

Continentality
- Bogdan, O., 30.2–290

Contrail formation
- Giles, B. D., 30.6–321
- Lenggenhager, K., 30.9–431

Convection effects on atmospheric electricity
- Weiss, R. O. et al., 30.12–417
- Willett, J. C., 30.5–472

Convection in frontal zones
- James, P. K. et al., 30.9–246

Convection in rotating fluids
- Daniels, P. G., 30.3–345

Convection influences in numerical forecasting
- Garrett, A. J., 30.11–81
- Heflick, S. et al., 30.12–76

Convection models
- Brenguier, J. L., 30.6–303; 30.7–318; 30.7–319
- Klaus, F. et al., 30.6–229
- Pastre, J. et al., 30.6–306
- Raymond, D. J., 30.9–410
- Redelsperger, J. L. et al., 30.6–308
- Rossignol, D., 30.6–309
- Somerville, R. C. J. et al., 30.9–411
- Sommeria, G., 30.6–310

Convection over the sea
- Mower, R. N. et al., 30.7–41
- Rákóczi, F. et al., 30.6–307

Convection over urban areas
- Melling, H., 30.11–316
- Novozhilov, N. I., 30.9–453

Convection processes
- Zhdanova, Ye. Yu., 30.6–311

Convection–turbulence processes
- Brenguier, J. L. et al., 30.7–318; 30.7–319
- Caughey, S. J. et al., 30.5–201
- Mahrt, L., 30.9–409
- Palmer, S. G. et al., 30.11–317
- Raymond, D. J., 30.9–410
- Weill, A. et al., 30.5–320
- Yamada, T. et al., 30.10–270

Convective activity
- Hayakawa, S., 30.5–189
- Manton, M. J., 30.5–350
- Mower, R. N. et al., 30.7–41
- Ogura, Y. et al., 30.8–387
- Palmer, S. G. et al., 30.11–317
- Randerson, D., 30.11–38
- Reuter, U., 30.5–351

Convective activity–cyclone relationships
- Bugayeva, G. V., 30.1–387

Convective cells
- Agee, E. M. et al., 30.3–313
- Ramond, D., 30.2–356
- Willis, G. E. et al., 30.4–382

Convective cloud cell development
- Sekihara, K. et al., 30.3–363

Convective cloud development
- Gelo, B., 30.12–279
- Manton, M. J., 30.5–350
- Raymond, D. J., 30.9–410
- Rossignol, D., 30.6–309

Convective cloud mechanism
- Chalon, J. P., 30.6–320
- Heymsfield, A. J. et al., 30.2–377

Convective cloud models
- Ramond, D., 30.2–356

Convective cloud seeding
- Nelson, L. D., 30.8–144

Convective clouds
- Ogura, Y. et al., 30.8–387

Convective energetics
- Prevost, L. et al., 30.11–340

Convective heat transfer
- Reuter, U., 30.5–351

Convective mixing
- Benkley, C. W. et al., 30.10–265
- Kostadinov, L. et al., 30.6–304
- Venkatram, A., 30.5–352

Convective motion
- Bugayeva, G. V., 30.1–387
- Götz, G., 30.6–217
- Moncrieff, M. W., 30.1–389
- Somerville, R. C. J. et al., 30.9–411
- Willis, G. E. et al., 30.4–382

Convective rainfall
- Ulanski, S. L. et al., 30.2–234; 30.2–235; 30.3–374

Convective storm formation
- Klemp, J. B. et al., 30.2–232

Convective storm models
- Klemp, J. B. et al., 30.2–232

Convective storms
- Breed, D. W., 30.9–239; 30.9–240
- Frank, W. M., 30.1–65
- Ogura, Y. et al., 30.8–387
- Ziegler, C. L., 30.9–241

Cooling ponds
- D'Souza, R. S. et al., 30.2–301
- Wesely, M. L., 30.11–292
- West, R. E., 30.5–330
- Yamada, T., 30.9–508

Cooling power variations
- Čabajová, Z., 30.1–472

Cooling tower effects
- Fett, W., 30.9–509
- Hanna, S. R., 30.11–134
- Rudolf, B., 30.11–146

Cooling tower plumes
- Brenguier, J. L., 30.6–303; 30.7–318; 30.7–319
- Klaus, F. et al., 30.6–229

Cooling towers
- West, R. E., 30.5–330

Cooperative Investigation of the

Caribbean and Adjacent Regions (CICAR)
  Merrell, W. J., Jr. et al., 30.9–586
  Molinari, R. L., 30.9–587

Lake shore erosion
Great Lakes Communicator [Ann Arbor, MI.], 30.6–518

Lake shore micrometeorology
Lui, P. Y., 30.11–377

Lake stratification
Carmack, E. C., 30.6–512
Svensson, U., 30.1–349
Tilzer, M. M. et al., 30.3–530

Lake temperature calculations
Albignat, J. P. et al., 30.9–337
Eggers, K. A. et al., 30.3–305
Richter, D., 30.3–290

Lake temperature estimation from satellite radiation measurements
Pitts, D. E. et al., 30.12–240

Lake temperature measurements
Funkquist, L., 30.7–291

Lake temperature profiles
Boyd, J. D. et al., 30.2–308
Lazier, J. et al., 30.2–309
Svensson, U., 30.1–349
Thendrup, A., 30.1–350

Lake temperatures
Allender, J. H. et al., 30.8–502
Hollan, E. et al., 30.3–336
Irwin, J., 30.1–348

Lake tides
Ward, R. B., 30.6–516

Lake turbidity
Strong, A. E. et al., 30.1–541

Lake water circulation
Boyce, F. M. et al., 30.11–503

Lake water composition
Bukata, R. P. et al., 30.4–547

Lake water mixing
Dat, J. et al., 30.10–495
Johnson, N. M. et al., 30.12–525
Ottesen Hansen, Niels-Erik, 30.1–545
Thorpe, S. A., 30.7–504
Tilzer, M. M. et al., 30.3–530

Lake water storage
Shih, S. F. et al., 30.6–483

Lake water upwelling
Hollan, E. et al., 30.3–336
Scarpace, F. L. et al., 30.8–503

Lake wave forecasting
Thompson, E. F., 30.5–558

Lake wave hindcasting
Thompson, E. F., 30.5–558

Lake wave observations
Doughty, B. C. et al., 30.9–564

Lakes and climate
Smith, K., 30.4–481

Land and sea breeze circulation
Kimura, R. et al., 30.2–332

Land and sea breeze effects
Panchal, N. S. et al., 30.2–185
Suzuki, Y. et al., 30.11–287

Land and sea breezes
Haase, F. M., 30.3–319
Hawkins, J. D., 30.9–354
Shershkov, V. V. et al., 30.8–378

Wu, Hsing-wu et al., 30.4–343

Land development
Takeuchi, K. et al., 30.2–457

Land–sea temperature difference
Wu, Hsing-wu et al., 30.4–343

Land subsidence
Broms, B. B. et al., 30.5–542
Fairchild, J. B. et al., 30.5–546
Holzer, T. L., 30.5–548
Lofgren, B. E., 30.5–538
MacMillan, J. R. et al., 30.5–549
Narasimhan, T. N. et al., 30.7–485
Piancharoen, C., 30.5–550
Poland, J. F., 30.5–545
Stephens, J. C. et al., 30.5–451
Stringfield, V. T. et al., 30.5–551
Wu, Chian-Min, 30.5–552

Land subsidence symposia
International Symposium on Land Subsidence, 2nd, Anaheim, CA., Dec. 13–17, 1976, 30.6–11

Land use effects
Hampicke, U., 30.5–2

Land use effects on erosion
Dunne, T., 30.12–308

Land use effects on hydrology
Pitman, W. V., 30.3–393
Ross, B. B. et al., 30.8–497

Land utilization
Takeuchi, K. et al., 30.2–457

Landscape studies
Sen'kovskaya, N. F., 30.4–473

Lapse rates
Held, I. M., 30.3–404
Maejima, I., 30.2–295
Stone, P. H. et al., 30.9–317

Large-scale dispersion
Husain, L. et al., 30.7–85

Large-scale eddies
Gall, R. et al., 30.10–191
Lau, Ngar-Cheung, 30.1–256

Large-scale eddy processes
Hartjenstein, G. et al., 30.10–267
Srivatsangam, S., 30.1–357
Srivatsangam, S. et al., 30.1–358

Laser anemometers
Brousaides, F. J., 30.7–29

Laser applications in meteorology
Chanin, M. L., 30.6–44
Earnshaw, K. B. et al., 30.1–50
Grams, G. W., 30.1–51
Ishimaru, A., 30.10–32

Laser beam absorption
Watkins, W. R. et al., 30.7–35; 30.8–44

Laser beam propagation
Azizyan, G. V. et al., 30.8–38
Clifford, S. F., 30.10–31
Crittenden, E. C. et al., 30.12–41
Gamo, H. et al., 30.12–42
Hill, R. J. et al., 30.9–516

Murty, S. S. R. et al., 30.12–43
Shapiro, J. H., 30.10–35
Strohbehn, J. W., 30.10–37
Strohbehn, J. W. (ed.), 30.10–36
Sutton, G. W. et al., 30.10–38
Valley, G. C., 30.7–294
Walsh, J. L. et al., 30.10–39
Yura, H. T., 30.11–46

Laser beam scattering
Bogdanov, R. I. et al., 30.9–43
Sassen, K. et al., 30.10–34; 30.11–44

Laser effects on air temperature
Walsh, J. L. et al., 30.10–39

Laser investigation of atmosphere techniques
Chanin, M. L., 30.6–44
Clifford, S. F., 30.9–44

Laser investigation of atmospheric pollution
Bogdanov, R. I. et al., 30.9–43
Hinkley, E. D. et al., 30.4–185
Patel, C. K. N., 30.6–168
Peckham, G. et al., 30.11–142
Rothe, K. W., 30.11–144

Laser investigation of clouds
Derr, V. E., 30.4–48
Post, M. J., 30.8–42

Laser investigation of diffusion
Schwiesow, R. L. et al., 30.9–49

Laser investigation of fog
Pinnick, R. G. et al., 30.12–278

Laser investigation of rain
Wang, Ting-I. et al., 30.9–50

Laser measurement of pressure
McGee, T. J. et al., 30.9–26

Laser measurement of rainfall
Wang, Ting-i et al., 30.8–43

Laser measurement of refractive index
Ochs, G. R. et al., 30.8–40

Laser measurement of temperature
Johnson, L. A., 30.11–43
McGee, T. J. et al., 30.9–26

Laser measurement of upper atmosphere composition
Menzies, R. T., 30.7–146

Laser measurement of water vapor
Peterson, J. C. et al., 30.6–45
Watkins, W. R. et al., 30.6–48

Laser measurement of wind
Matviyenko, G. G. et al., 30.1–52
Ochs, G. R. et al., 30.8–40

Laser meteorology
Clifford, S. F., 30.9–44
Earnshaw, K. B. et al., 30.8–82

Laser observation of atmospheric composition
Eng, S. T., 30.11–42
Wiesemann, W. et al., 30.11–45

Laser observation of atmospheric pollution
Ball, D. J. et al., 30.4–179

Laser observation of ocean currents
Lespinard, G., 30.11–540

Laser radar measurement of wind
Teoste, R. et al., 30.1–31

Laser radiation transmission in clouds
Bisyarin, V. P. et al., 30.3–28
Sassen, K. et al., 30.10–34; 30.11–44

Laser radiation transmission in fog
Bisyarin, V. P. et al., 30.3–28

Volkovitskiy, O. A. et al., 30.6–47

Laser spectroscopy
Etz, E. S. et al., 30.4–184
Planet, W. G. et al., 30.6–413

Laser uses in meteorology
Earnshaw, K. B. et al., 30.8–82

Lasers in atmospheric research
Grams, G. W., 30.1–51

Latent heat release
Götz, G., 30.11–212
Hamilton, K., 30.11–297

Latitude ozone variations
Koprova, L. I. et al., 30.2–120

Leaching
Cronan, C. S. et al., 30.7–341
Gureghian, A. B. et al., 30.9–480
Hoffman, G. H. et al., 30.10–475
Raats, P. A. C., 30.10–340; 30.10–341
Reuss, J. O., 30.8–406
Rhoades, J. D. et al., 30.10–342
Smiles, D. E. et al., 30.5–410

Lead-210 in river water
Servant, J. et al., 30.3–525

Lead content of air determination
Emmel, R. et al., 30.4–183

Lead content of river water
Servant, J. et al., 30.3–525

Leaf micrometeorology
Yabuki, K. et al., 30.1–380

Leaf temperatures
Hasegawa, S., 30.5–431

Lecture series
Malkus, W. V. R. et al., 30.3–2

Lee wave clouds
Burroughs, L. D. et al., 30.10–300

Lee wave development
Inoue, O., 30.12–265

Lee wave propagation
Berkshire, F. H. et al., 30.2–357

Lee wave theories
Burroughs, L. D., 30.6–284

Lee waves
Gjevik, B. et al., 30.2–358

Legal aspects of groundwater
Fleming, R. B. et al., 30.7–492

Legal aspects of weather modification
Davis, R. J., 30.6–131; 30.10–92
Firor, J. W., 30.4–155
Hansen, R. P., 30.4–156

Jones, N. L. et al., 30.12–92
Kahan, A. M., 30.10–96
Sherman, H. D., 30.10–98
Symposium of the National Conference of Lawyers and Scientists, Duke Univ., March 11–12, 1976, 30.4–7
Taubenfeld, H. J., 30.4–160

Legal aspects of wind power utilization
Program of Policy Studies in Science and Technology, 30.3–332

Legalities of weather modification
Kirby, J. W., 30.10–97

Legumes
Rüegg, J. J. et al., 30.3–263

Lenticular clouds
Downey, W. K., 30.1–285

Lentil cultivation
Vasenina, G. G., 30.9–507

Le Verrier
Dettwiller, J., 30.6–17

Lichenometry
Humlum, O., 30.5–427

Lidar beam scattering
Balin, Yu. S. et al., 30.5–29

Lidar beam transmission
Pratte, F. et al., 30.9–47

Lidar equipment
Post, M. J. et al., 30.8–41
Uthe, E. E., 30.4–57

Lidar in atmospheric research
Huffaker, R. M. et al., 30.9–45
Pal, S. R. et al., 30.1–53
Phillips, P., 30.12–37
Svanberg, S., 30.11–147
Zuyev, V. Ye., 30.1–55

Lidar investigation of hydrometeors
Sanders, M. J., Jr., 30.9–48

Lidar investigation of snow
Bogorodskiy, V. V. et al., 30.8–418

Lidar measurement of temperature profiles
Gill, R. et al., 30.7–280

Lidar measurement of wind
Bilbro, J. W. et al., 30.1–49
Huffaker, R. M. et al., 30.9–45
Huffaker, R. M. (ed.), 30.12–32
Post, M., 30.12–33
Post, M. J. et al., 30.2–40

Lidar observation of aerosols
Derr, V. E. et al., 30.8–39
Kent, G. S., 30.3–29
Post, M. J. et al., 30.9–46
Reiter, R. et al., 30.10–33
Uthe, E. E., 30.4–57
Zuyev, V. Ye., 30.1–55; 30.1–56

Lidar observation of atmospheric composition
Zakharov, V. M. et al., 30.1–54

Lidar observation of atmospheric pollution
Derr, V. E. et al., 30.8–39
Hoff, R. M. et al., 30.5–121
Schwiesow, R. L. et al., 30.9–49
Uthe, E. E., 30.4–57
Zakharov, V. M. et al., 30.1–54

Lidar observation of clouds
Platt, C. M. R. et al., 30.2–39
Sassen, K. et al., 30.10–34

Lidar observation of humidity
Pourny, J. C. et al., 30.6–46

Lidar observation of stratospheric aerosols
Fegley, R. W., 30.9–164
Hamill, P. et al., 30.7–145
McCormick, M. P. et al., 30.2–115
Reiter, R., 30.1–198; 30.10–33; 30.12–133
Remsberg, E. E. et al., 30.8–204; 30.12–44
Russell, P. B. et al., 30.8–206

Lidar observation of upper atmosphere composition
Rowlett, J. R. et al., 30.2–41

Lidar transmission through clouds
Pratte, F. et al., 30.9–47

Light attenuation by snow
Mason, J. B., 30.9–515

Light attenuation in seawater
Ohm, K., 30.11–538

Light effects on plants
Rüegg, J. J. et al., 30.3–263

Light effects on seed germination
Collins, W. J. et al., 30.5–247
Light intensities in plant cover
Mann, J. E. et al., 30.10–218
Light penetration in lakes
Tilzer, M. M. et al., 30.3–530
Light penetration of plant cover
Hatfield, J. L. et al., 30.10–213
Mann, J. E. et al., 30.10–218
Light propagation through atmospheric turbulence

Long waves in ocean
Saint-Guily, Bernard, 30.6–577
Symposium on Long Waves in the Ocean, National Research Council, Ottawa, June 6–8, 1978, 30.10–7

Long waves in shallow water
Gravesen, H. et al., 30.10–590

Long waves in stratosphere
Simmons, A. J., 30.1–269

Longshore current forecasting
Meadows, G. A., 30.3–599

Longshore current formation
Dalrymple, R. A. et al., 30.6–588
Meadows, G. A., 30.3–599

Longshore current studies
De Maio, A. et al., 30.8–562

Longshore currents
Elliott, A. J., 30.11–544
Nummedal, D. et al., 30.5–595
Smith, N. P., 30.6–589
Loop Current
Maul, G. A., 30.9–584
Merrell, W. J., Jr. et al., 30.9–586
Loop prominences
Engvold, O. et al., 30.11–480
Low cloud formation
Matveyev, L. T. et al., 30.2–376
Low cloudiness
Bilyalov, P. B. et al., 30.8–398
Low frequency radio-wave propagation
Nestrov, G. T., 30.6–468
Low-level inversions
Klöppel, M. et al., 30.3–299
Suzuki, Y. et al., 30.11–287
Low-level jet stream
Cadet, D. et al., 30.7–316
Haase, F. M., 30.3–319
Hart, J. E. et al., 30.3–342
Ngara, T. et al., 30.2–353
Low-level jet stream instability
Raymond, D. J., 30.3–343
Low-level sounding systems
Bahmann, W., 30.4–110
Low-level turbulence
Jensen, N. O., 30.2–315
Reece, F. D., 30.5–321
Low salinity waters
Meincke, J., 30.3–566
Reed, R. K. et al., 30.5–577
Low temperature effects on rice paddies
Satake, T., 30.5–287
Low temperatures
Tout, D. G., 30.4–341
Lower ionosphere
Ashkaliyev, Ya. F., 30.10–148
Gnanalingam, S. et al., 30.1–216
Laštovička, J., 30.5–161
Lower stratospheric winds
Fukao, S. et al., 30.2–350
Lower thermosphere composition
Akmayev, R. A. et al., 30.3–162; 30.3–163
Martynkevich, G. M., 30.9–192
Lower thermosphere densities
Marcos, F. A. et al., 30.2–143; 30.8–20
Lower thermosphere models
Champion, K. S. W. et al., 30.5–141
Keneshea, T. J. et al., 30.7–149
Lower thermospheric winds
Kazimirovskiy, E. S. et al., 30.10–286
Miyahara, S., 30.2–146
Rind, D., 30.4–242
Lower tropospheric winds
Haase, F. M., 30.3–319
Lucerne cultivation
Danilov, S. S. et al., 30.1–474
Lunar atmospheric electricity
Manka, R. H., 30.12–395
Lunar atmospheric tides
Palumbo, A., 30.7–410
Lunar diurnal geomagnetic variations
Sastri, N. S. et al., 30.5–523
Lunar ionospheric variations
Huang, Yinn-Nien, 30.4–509
Lunar semidiurnal magnetic variations
Stening, R. J. et al., 30.8–480
Lunar tidal effects on ionosphere
Rao, M. S. et al., 30.6–207
Lyman-alpha absorption
Knuth, R. et al., 30.8–267

M

Magnetic anomalies
Blakely, R. J. et al., 30.3–498
Magnetic effects on cosmic rays
Alpers, W. et al., 30.2–274
Magnetic field effects on ocean currents
Semenov, V. Yu. et al., 30.5–583
Magnetic index
Campbell, W. H., 30.7–476
Magnetization of lavas
Blakely, R. J. et al., 30.3–498
Magnetization of mountains
Blakely, R. J. et al., 30.3–498
Magnetization of rocks
Rakshit, A. K., 30.2–507
Magnetopause
Eastman, T. E. et al., 30.8–299
Holzer, R. E. et al., 30.1–521
Ivanov, K. G. et al., 30.3–501

Oceanography textbooks
Knauss, J. A., 30.12–542

Oceans, seas, and interconnections
Antonia, R. A. et al., 30.3–202

Odor pollution control
Wasfi, A. K. et al., 30.3–152

Offshore drilling
Picard, A. L., 30.3–12

OGO, *see* **Orbiting Geophysical Observatory**

Oil dispersion in seawater
Zimmermann, K. A. et al., 30.12–567

Oil pipelines
Campbell, W. H., 30.1–530

Oil pollution–ocean waves relationships
Bespalova, Ye. A. et al., 30.6–418

Oil pollution of beaches
Owens, E. H., 30.4–600

Oil pollution of seas
Ariel', N. E. et al., 30.7–79
Baker, E. T. et al., 30.2–542
Bespalova, Ye. A. et al., 30.6–418
Sheveleva, T. Yu. et al., 30.3–267

Oil slick detection
Guinn, J. A., Jr. et al., 30.7–232

Oil slick movement
Galt, J. A. et al., 30.5–578

Omega system for wind measurement
Loitière, B. et al., 30.6–38
Olson, M. L. et al., 30.4–30; 30.5–22; 30.10–23

Operation Deep Freeze, 1978
Salinas, M. G., 30.11–58

Optical density of clouds
Timanovskaya, R. G., 30.12–213

Optical depth determination
Kriebel, K. T., 30.5–249

Optical instruments
Deepak, A. et al., 30.3–22

Optical investigation of atmospheric pollution
Fujii, Y. et al., 30.2–99

Optical method of aerosol measurement
Box, M. A. et al., 30.7–101
Fymat, A. L. et al., 30.1–170
King, M. et al., 30.3–128

Optical method of temperature measurement
Fraser, A. B., 30.9–25
Mach, W. H. et al., 30.9–27

Optical methods of wind measurement
Ochs, G. R. et al., 30.8–27; 30.8–31

Optical phenomena
Heuer, K., 30.7–413

Optical properties of fog
Low, R. D. H. et al., 30.7–336

Optical properties of seawater
Bekasova, O. D. et al., 30.10–535
Gordon, H. R., 30.7–231
Kozlyaninov, M. V., 30.10–223

Optical properties of snow
Berger, R. H., 30.11–353

Optical properties of the atmosphere
Hill, R. J. et al., 30.9–516
Lawrence, R. S., 30.9–215

Optical refraction at sea
Antonia, R. A. et al., 30.3–202

Optical refractive index
Hall, F. F., Jr., 30.9–214
Wyngaard, J. C., 30.9–216

Optical refractive index fluctuations
Antonia, R. A. et al., 30.3–202
Lawrence, R. S., 30.9–215
McBean, G. A. et al., 30.11–193

Optical resolution of atmospheric turbulence
Loos, G. C. et al., 30.12–246

Optical resolution of turbulence
Vernin, J. et al., 30.3–308

Optical sounding techniques
Ishimaru, A., 30.10–32

Optical soundings
Churnside, J. H. et al., 30.10–25

Optical techniques
Genda, H. et al., 30.2–429
Ochs, G. R. et al., 30.3–24; 30.8–83; 30.8–84

Optics of aerosols
Bridgman, H. A., 30.1–488
Carlon, H. R., 30.7–103
Filippov, V. L. et al., 30.9–517
Griggs, M., 30.8–162
Mugnai, A. et al., 30.1–182
Shaw, G. E., 30.10–124
Thielke, J. F. et al., 30.3–149

Optimum oceanographic measurements
White, W. B. et al., 30.8–528

Optimum station networks
Meeres, L. S., 30.9–484

Orbital influences
Berger, A. L., 30.3–254

Orbital theory of climatic changes
Cess, R. D. et al., 30.10–352
House, F. B., 30.11–369
Wollin, G. et al., 30.3–424

Orbiting Geophysical Observatory-5
Kaye, S. M. et al., 30.12–494
Sonnerup, B. U. Ö. et al., 30.7–464

Orbiting Geophysical Observatory-6
Keating, G. M. et al., 30.9–185
Kelley, M. C. et al., 30.6–421
Trefall, H. et al., 30.10–247

Orbiting Solar Observatory-8
Vial, Jean-Claude et al., 30.9–548; 30.9–552

Organic carbon in soil
Bohn, H. L., 30.2–89

Organic matter in seawater
Bishop, J. K. B. et al., 30.4–572

Origin of planetary atmospheres
Bauer, S. J., 30.3–470
Pollack, J. B. et al., 30.10–396

Origin of solar wind
Kovalenko, V. A., 30.4–312

Orographic clouds
Bibikova, T. N., 30.6–317
Nickerson, E. C. et al., 30.11–318

Orographic effects on airflow
Astley, R. J. et al., 30.3–307
Buzzi, A. et al., 30.7–210
Daniels, P. A. et al., 30.1–366
Grose, W. L., 30.5–456
Mason, P. J. et al., 30.5–192

Peltier, W. R. et al., 30.12–266
Smith, R. B., 30.2–359; 30.5–353

Orographic effects on atmospheric circulation
Ashe, S., 30.5–202
Gadgil, S., 30.2–199
Langley, P. et al., 30.10–193

Orographic effects on atmospheric pollution
Egan, B. A. et al., 30.7–9
Mason, P. J., 30.7–125
Reid, J. D., 30.5–127

Orographic effects on climate
Chanysheva, S. G. et al., 30.8–449

Orographic effects on clouds
Gelo, B., 30.12–279
Manton, M. J., 30.9–451

Orographic effects on diffusion
Mason, P. J., 30.7–125
Okamoto, H. et al., 30.7–127

Orographic effects on energy budget
Taylor, K. E., 30.10–198

Orographic effects on fronts
Schwarzl, S., 30.12–199

Orographic effects on ionosphere
Depuyeva, A. Kh. et al., 30.4–503

Orographic effects on monsoon
Das, P. K. et al., 30.2–193
Gadgil, S. et al., 30.9–366

Orographic effects on precipitation
Hill, F. F. et al., 30.5–392
Hill, G. E., 30.1–427
Smith, G. I. et al., 30.6–341

Orographic effects on rainfall
Manton, M. J., 30.9–451
Mooley, D. A., 30.6–292
Raddatz, R. L. et al., 30.11–344

Orographic effects on sea breezes
Camuffo, D. et al., 30.7–306

Orographic effects on snow cover
Meier, R. et al., 30.12–324

Orographic effects on snow melting
Kubota, H. et al., 30.11–357

Orographic effects on temperature distribution
Weise, A., 30.4–336

Orographic effects on temperature inversions
Lutfiyev, Kh. L., 30.8–361

Orographic effects on thunderstorms
Beşleagă, N. et al., 30.12–194

Orographic effects on turbulence
Perry, S. G. et al., 30.1–359
Peterson, E. W. et al., 30.7–293

Orographic effects on weather
Gressel, W., 30.12–375
Petkovšek, Z., 30.5–457
Reuter, H., 30.12–186

Orographic effects on wind
Behnke, W., 30.6–281
Peterson, E. W. et al., 30.7–293
Rooney, D. M. et al., 30.9–413
Taylor, P. J. et al., 30.10–277

Orographic rainfall
Sarker, R. P. et al., 30.9–452

Orographic turbulence
Burroughs, L. D., 30.6–284
Panchev, S. et al., 30.6–219
Raithby, G. D. et al., 30.3–312
Reece, F. D., 30.5–321

Orographic waves
Rooney, D. M. et al., 30.9–413

OSO, *see* **Orbiting Solar Observatory**

Outer radiation belt
Kuznetsov, S. N. et al., 30.4–315

Overland flow
Bonell, M. et al., 30.3–386
Ross, B. B. et al., 30.8–497

Oxidant concentration in air
Hov, Øystein et al., 30.7–116
Shikata, H. et al., 30.7–91

Oxidation
Campbell, M. J. et al., 30.7–82
Davis, D. D. et al., 30.5–110
Mamane, Y. et al., 30.5–124
Penkett, S. A. et al., 30.5–383; 30.6–136

Oxygen-18 in particulate matter
Holt, B. D. et al., 30.3–204

Oxygen-18 in snow
Koerner, R. et al., 30.12–319

Oxygen-18 in water vapor
Holt, B. D. et al., 30.3–204

Oxygen absorption spectra
Blake, A. J., 30.10–226
Longmire, M. S. et al., 30.7–235

Oxygen bands
Blake, A. J., 30.10–226
Nakazawa, T. et al., 30.9–280

Oxygen distribution in ocean
Reid, J. L. et al., 30.2–549

Oxygen distributions in seawater
Chernyakova, A. M., 30.3–552

Oxygen exchange, ocean–atmosphere
Ariel', N. E. et al., 30.7–79

Oxygen green lines
Bates, D. R., 30.9–279
Witt, G. et al., 30.7–242

Oxygen in lake water
Boyd, J. D. et al., 30.2–308
Burns, N. M. et al., 30.4–546

Oxygen in lower thermosphere
Akmayev, R. A. et al., 30.3–162; 30.3–163
Klimov, N. N. et al., 30.10–131

Wilcox, J. M., 30.11–409

Solar cap absorption
Shirochkov, A. V., 30.6–210

Solar cells
Dave, J. V., 30.2–239; 30.4–287
Robinson, A. L., 30.7–12

Solar–climate relationships
Dicke, R. H., 30.12–380
Goldberg, R. A., 30.11–396
Kondrat'yev, K. Ya. et al., 30.11–167
Mörth, H. T. et al., 30.11–401
Pittock, A. B., 30.11–402
Roberts, W. O., 30.11–403
Symposium/Workshop on Solar–Terrestrial Influences on Weather and Climate, Ohio State Univ., Columbus, Aug. 24–28, 1978, 30.11–6
Tavakol, R. K., 30.5–466
Wilcox, J. M., 30.10–369

Solar collectors
Motschka, O. et al., 30.1–295

Solar constant
Rew, J., 30.12–208

Solar constant–climate relationships
Asakura, T. et al., 30.5–418

Solar constant measurement techniques
Rew, J., 30.12–208

Solar constant–solar activity relationships
Hoyt, D. V., 30.11–397

Solar constant variations
Hoyt, D. V., 30.11–397
Kosters, J. J. et al., 30.9–263

Solar convection zone
Belvedere, G. et al., 30.5–505

Solar corona expansion
Jackson, B. V. et al., 30.5–508

Solar corona–geomagnetic relationships
Musman, S. et al., 30.1–526

Solar corona photographs
Krämer, G. et al., 30.1–515

Solar corona structure
Rušin, V. et al., 30.10–431

Solar cosmic-ray propagation
Duggal, S. P., 30.12–226
Mikirova, N. A. et al., 30.3–286
Morfill, G. E. et al., 30.12–227

Mullan, D. J. et al., 30.10–248
Owens, A. J., 30.12–228
Yung-nien, Huang, 30.9–309

Solar cosmic rays
Duggal, S. P., 30.12–226

Solar cycle–atmospheric circulation relationships
Brown, G. M. et al., 30.5–462

Solar cycle–ionospheric relationships
Huang, Yinn-Nien, 30.1–221

Solar cycle–solar EUV radiation relationships
Hinteregger, H. E., 30.9–267

Solar cycles
Link, F., 30.2–500

Solar cycles, 22-year
Csada, I. K., 30.3–481
Dicke, R. H., 30.12–380

Solar diurnal geomagnetic variations
Sastri, N. S. et al., 30.5–523

Solar eclipse, Nov. 1966
Heaps, M. G. et al., 30.7–165

Solar eclipse, July 1972
Lane-Smith, D. R. et al., 30.12–404

Solar eclipse, June 1973
Danilov, A. D. et al., 30.9–178
Léna, P. et al., 30.9–546

Solar eclipse, April 1976
Deliyannis, J. et al., 30.12–206
Shirmammedov, M. et al., 30.3–191
Spasov, Kh., 30.5–174

Solar eclipse, Oct. 1976
Butcher, E. C. et al., 30.8–246
Labrum, N. R. et al., 30.5–504
Lilley, F. E. M. et al., 30.1–525

Solar eclipse, Feb. 1979
Canada Weekly [Ottawa], 30.6–425

Solar eclipse effects on radiation
Deliyannis, J. et al., 30.12–206

Solar eclipse observations
Canada Weekly [Ottawa], 30.6–425

Solar effects on ionosphere
Belikovich, V. V. et al., 30.4–205
Somsikov, V. M., 30.3–445

Solar emissions
Livingston, W. C., 30.11–246

Solar energy availability
Brothers, P. W., 30.3–243
Ramage, C. S., 30.10–210
Steinhauser, F., 30.1–297

Solar energy collecting devices
Cahn, R. W., 30.4–284
Dave, J. V., 30.2–239
Leshuk, J. P. et al., 30.1–294

Solar energy collector surfaces
Grimmer, D. P. et al., 30.3–245
Iqbal, M., 30.5–235

Solar energy collectors
Body, Y. et al., 30.9–252
Cole, R. J., 30.10–212
Edwards, B. P., 30.4–288
Mansfield, R. G. et al., 30.6–260
Thompson, J. D., 30.6–280
Wijeysundera, N. E., 30.6–264

Solar energy conferences
Workshop on Solar Energy Protection, Opening and Plenary Sessions, Atlanta, GA., May 3–6, 1978, 30.11–5

Solar energy research
Robinson, A. L., 30.7–12
United States Dept. of Energy, Division of Solar Technology, Wash., D.C., 30.5–7
Won, T. K., 30.11–250

Solar energy resources
Atwater, M. A. et al., 30.1–311
Breuer, G., 30.2–237
Brothers, P. W., 30.3–243
Collares-Pereira, Manuel et al., 30.5–233
Czelnai, R., 30.4–12
Goh, T. N., 30.5–239
Jannuzzi, J. A., 30.10–207
Lawford, R. G. et al., 30.11–245
Lerfald, G. M. et al., 30.9–276
Ramage, C. S., 30.10–210
Schweitzer, S., 30.6–261
Symposium on Meteorology and Energy, Wellington, N.Z., Oct. 11–12, 1977, 30.4–8

Solar energy utilization
Abatut, J. L. et al., 30.3–242
Breuer, G., 30.2–237
Cahn, R. W., 30.4–284
Camuffo, D., 30.12–203
Dave, J. V., 30.4–287
Edwards, B. P., 30.4–288
Grether, D. et al., 30.12–204
Ireland, P. J. et al., 30.9–274

United States Atmospheric Turbulence and Diffusion Lab., Oak Ridge, TN., 30.6–226
Wyngaard, J. C., 30.7–296
Turbulence spectra
Irwin, H. P. A. H., 30.10–185
Iwatani, Y., 30.12–244
Kristensen, L., 30.10–186
Turbulence spectra near the ground
Motha, R. P. et al., 30.8–375
Turbulence–stability relationships
Hicks, B. B., 30.3–310
Turbulence structure

  Caughey, S. J. et al., 30.11–300
  Hennemuth, B., 30.4–257

Turbulence symposia
  Symposium on Turbulence, Diffusion, and Air Pollution, 4th, Reno, NV., Jan. 15–18, 1979, 30.3–9

Turbulence theories
  Binkowski, F. S., 30.5–195
  Ibbetson, A., 30.7–194
  Tsugé, S., 30.12–170

Turbulent diffusion
  Barayshchuk, S. I. et al., 30.8–176
  Gifford, F. A., Jr., 30.6–285
  Ibbetson, A., 30.7–194

Turbulent diffusion analysis
  Chatwin, P. C. et al., 30.8–309
  Dimet, F. X. et al., 30.6–223
  Middleton, J. H., 30.7–195

Turbulent diffusion experiments
  Puttock, J. S., 30.5–198
  Reid, J. D., 30.5–127

Turbulent diffusion in lakes
  Ottesen Hansen, Niels-Erik, 30.1–545

Turbulent diffusion in oceans
  Sherman, F. S. et al., 30.10–544
  Zimmermann, K. A. et al., 30.12–567

Turbulent diffusion in the sea
  De Guida, R. N. et al., 30.1–583
  Schott, F. et al., 30.3–561
  Wang, S. T. et al., 30.7–559

Turbulent diffusion of pollutants
  Huang, C. H., 30.7–201
  Hunt, J. C. R. et al., 30.9–224
  Neumann, J., 30.1–249

Turbulent diffusion theories
  Berkowicz, R. et al., 30.8–308
  Horák, J., 30.5–196; 30.5–197
  Neumann, J., 30.1–249
  Praham, L. P. et al., 30.8–310
  Zaytsev, A. S., 30.6–227

Turbulent dispersion of particles
  Horák, J., 30.5–196; 30.5–197

Turbulent energy
  Basdevant, C. et al., 30.4–255

Turbulent exchange in lower atmosphere
  Herbert, F. et al., 30.10–127
  Kirchner, M., 30.4–502
  Poggi, A., 30.9–344

Turbulent exchange in plant canopies
  Brutsaert, W., 30.11–379
  Finnigan, J. J., 30.10–266

Turbulent exchange near the ground
  Druilhet, A. et al., 30.3–311

Turbulent exchange over seas
  Davidson, K. L. et al., 30.12–247

Turbulent flow
  Mulhearn, R. J. et al., 30.2–183
  Schlesinger, R. E., 30.3–212

Turbulent fluctuations
  Schumann, U. et al., 30.3–213

Turbulent flux calculations
  Lo, A. K. et al., 30.2–322; 30.3–316

Turbulent fluxes over forests
  Raupach, M. R., 30.11–305
  Thompson, N., 30.11–299

Turbulent fluxes over sea
  Large, W. G. et al., 30.11–304
  Resch, F. J. et al., 30.10–268
  Schmitt, K. F. et al., 30.9–345

Turbulent fluxes over water
  Hsu, S. A., 30.5–430

Turbulent heat flux
  Brook, R. R., 30.5–322
  Hurtalova, T., 30.5–325
  Riehl, H. et al., 30.5–328

Turbulent heat transfer in water
  Haynes, F. D. et al., 30.11–502

Turbulent kinetic energy
  Caughey, S. J. et al., 30.5–201
  McBean, G. A. et al., 30.1–253
  Schlesinger, R. E., 30.3–212

Turbulent mixing
  Benkley, C. W. et al., 30.10–265

Turbulent mixing in upper atmosphere
  Akmayev, R. A. et al., 30.3–162

Turbulent moisture flux
  Riehl, H. et al., 30.5–328

Turbulent motion
  Schumann, U. et al., 30.3–213; 30.3–214

Turbulent shear flow
  Barcilon, A. et al., 30.5–194

Turbulent temperature fluctuations
  Pfeffer, R. L. et al., 30.3–317
  Warhaft, Z. et al., 30.3–215

Turbulent transfer over crops
  Motha, R. P. et al., 30.9–349

Turbulent velocity field
  Takeuchi, K., 30.11–203

TWERLE (Tropical Wind, Energy Conversion, and Reference Level Experiment)
  Julian, P. R., 30.4–67
  Levanon, N. et al., 30.8–69
  Mills, G. A., 30.6–72

Twilight ultraviolet emission
  Monfils, A. et al., 30.9–519

Two-dimensional turbulence
  Basdevant, C. et al., 30.4–255

Typhoon effects on ocean
  Arsen'yev, S. A. et al., 30.1–274

Typhoon havens
  Brand, S. et al., 30.3–238

Typhoon "June" (1975)
  Grody, N. C. et al., 30.11–227

Typhoon pressure
  Fujiwhara, S. et al., 30.5–217

Typhoon winds
  Fujiwhara, S. et al., 30.5–217
  Grody, N. C. et al., 30.11–227
  Woo, H. G. C. et al., 30.5–220

U

Ukrainian Hydrometeorological Scientific Research Institute
  Logvinov, K. T., 30.11–11

Ulceration
  Leng, E., 30.4–488
  Weihe, W. H. et al., 30.6–385; 30.6–386

ULF emissions

Gendrin, R. et al., 30.5–45
Perraut, S., 30.5–49

Ultraviolet emission in auroras
Beiting, E. J., III et al., 30.7–420
Sharp, W. E., 30.2–475

Ultraviolet radiation absorption in seawater
Monahan, E. C. et al., 30.3–595

Ultraviolet radiation distribution
Paltridge, G. W. et al., 30.1–307

Ultraviolet radiation effects on cancer
Urbach, F. et al., 30.8–236

Ultraviolet radiation effects on man
Paltridge, G. W. et al., 30.4–302

Ultraviolet radiation effects on nuclei formation
Reiter, R. et al., 30.11–325

Ultraviolet radiation effects on plants
Biggs, R. H., 30.8–216

Ultraviolet radiation effects on stratospheric composition
Callis, L. B. et al., 30.2–252

Ultraviolet radiation effects on stratospheric temperature
Callis, L. B. et al., 30.2–252
Rycroft, M. J. et al., 30.8–366
Theobald, A. G. et al., 30.1–298

Ultraviolet radiation from solar flares
Odintsova, I. N. et al., 30.8–342

Ultraviolet radiation in the upper atmosphere
Sundararaman, N., 30.8–344

Ultraviolet radiation intensities
Chernyshev, V. I., 30.4–301

Vinogradov, A. S., 30.10–546
Vertical distribution of aerosols
Rӧssler, F., 30.8–172
Vertical distribution of atmospheric pollution
Polezhayev, G. P., 30.8–170
Vertical distribution of condensation nuclei
Rosen, J. M. et al., 30.2–374
Vertical distribution of meteorological elements
Elizbarashvili, E. S., 30.2–458
Endrődi, G. et al., 30.5–52
Niedrauer, T. et al., 30.1–59
Vertical flux processes

Brook, R. R., 30.5–322

Vertical heat flux measurement techniques
Wyngaard, J. C. et al., 30.1–365

Vertical heat transfer
Garratt, J. R. et al., 30.5–324

Vertical ionospheric drift
Anderson, D. N. et al., 30.12–142
Spasov, Kh., 30.5–174

Vertical ionospheric motions
Mathews, J. D. et al., 30.10–161

Vertical mixing in sea
Forster, W. C. et al., 30.9–590
Killworth, P. D., 30.8–551
Odd, N. V. M. et al., 30.6–597
Voituriez, B. et al., 30.7–545

Vertical momentum flux measurement techniques
Wyngaard, J. C. et al., 30.1–365

Vertical motion calculation
Smith, P. J. et al., 30.3–344

Vertical motion calculations
Ragette, G., 30.1–386

Vertical motion in boundary layer
Guillemet, B. et al., 30.7–320

Vertical motion in cyclones
Ivanov, V. Kh., 30.4–269

Vertical motion in mesosphere
Miller, K. L. et al., 30.2–117

Vertical motion in severe local storms
Thorpe, A. J. et al., 30.2–233

Vertical motion measurement techniques
Larsen, S. E. et al., 30.9–37
Ragette, G., 30.1–386

Vertical motion of seawater
Johnson, D. R. et al., 30.10–562

Vertical motion over urban areas
Anderson, S. et al., 30.11–311
Melling, H., 30.11–316

Vertical ozone distribution
Dziewulska-Łosiowa, Aniela et al., 30.6–133
Fricke, W. et al., 30.4–170
Hilsenrath, E. et al., 30.12–139
Sellers, B. et al., 30.8–343

Vertical ozone distribution measurement techniques
DeLuisi, J. J., 30.8–220
Mateer, C. L. et al., 30.8–227

Vertical ozone distribution measurements
Figueira, M. F., 30.8–154
Robbins, D. E. et al., 30.8–234

Vertical ozone profiles
Evans, W. F. J. et al., 30.8–222

Vertical ozone transport
Pierrard, J. M. et al., 30.4–174

Vertical propagation of atmospheric waves
Brown, G. M. et al., 30.8–313

Vertical radioactivity of seawater distribution
Fukai, R. et al., 30.8–539

Vertical temperature gradient
Hormann, K., 30.9–310
Tollner, H., 30.1–339

Vertical temperature profiles
Gamo, M. et al., 30.12–248

Vertical turbulent diffusion
Briggs, G. A. et al., 30.11–303
Weinstock, J., 30.2–187

Vertical velocity calculations
Kulkarni, P. G., 30.2–355

Vertical velocity computation
Singh, U. S. et al., 30.9–408

Vertical velocity fluctuation measurement techniques
SethuRaman, S. et al., 30.7–317

Vertical velocity in monsoons
Kulkarni, P. G., 30.2–355

Vertical water movement in the ocean
Dorrestein, R., 30.5–16

Vertical water vapor flux measurement techniques
Wyngaard, J. C. et al., 30.1–365

Vertical wind shear
Al'ter-Zalik, Yu. Zh., 30.5–347

Vertical wind velocity measurement techniques
Akimakopoulos, D. N. et al., 30.2–354

Very High Resolution Radiation data analysis
Takashima, T. et al., 30.3–46

Viking Mars lander
Chen, R. H. et al., 30.1–509

Vineyard climatology
Legrand, J. P., 30.6–380

Visibility in clouds
Low, R. D. H., 30.9–514

Visibility in fog
Fitzgerald, J. W., 30.1–407
Low, R. D. H., 30.9–514
Pinnick, R. G. et al., 30.1–408
Smith, S. G., 30.1–487

Visibility in haze
Pinnick, R. G. et al., 30.1–408
Presle, G. et al., 30.3–447

Visibility in snow
Mason, J. B., 30.9–515

Visibility on highways
Smith, S. G., 30.1–487

Visibility regime
Lawrence, E. N., 30.4–510

Visibility restrictions
Barone, J. B. et al., 30.2–466

Visual aids
Warnecke, G., 30.6–182

Visual range measurement techniques
Harrison, A. W., 30.9–96

Visual range of light signals
Presle, G. et al., 30.3–447

VLF emission generation
Bespalov, P. A. et al., 30.3–467
Kovner, M. S. et al., 30.2–477
Prakash, R. et al., 30.10–393

VLF emission theories
Prakash, R. et al., 30.10–393

VLF emissions
Cornilleau-Wehrlin, Nicole et al., 30.5–43; 30.5–44

VLF emissions–auroral relationships
Doolittle, J. H. et al., 30.9–287

VLF emissions–geomagnetic storm relationships
Hayashi, K. et al., 30.1–501

VLF emissions in magnetosphere
Curtis, S. A. et al., 30.6–419
Helliwell, R. A. et al., 30.9–210

VLF hiss propagation

Usher, R. A. et al., 30.9–204
Yamamoto, T., 30.7–433

VLF sferics
Harth, W. et al., 30.5–480

VLF waves in magnetosphere
Helliwell, R. A. et al., 30.9–210
Park, C. G., 30.9–525
Rosenberg, T. J. et al., 30.9–213

Volcanic dust
Ōkoshi, N., 30.11–141

Volcanic dust analysis
Lepel, E. A. et al., 30.5–468

Volcanic dust effects on solar radiation
Hoyt, D. V., 30.10–216
Mendonca, B. G. et al., 30.3–446

Volcanic dust in stratosphere
Karol', I. L. et al., 30.3–266
McCormick, M. P. et al., 30.2–115

Volcanic dust movements
Lee, L. G., 30.1–376

Volcanic eruption, Fuego, Guatemala (Oct. 1974)
Ōkoshi, N., 30.11–141

Volcanic eruption, Mt. St. Augustine (Jan. 1976)
Lepel, E. A. et al., 30.5–468

Volcanic eruption effects on climate
Bradley, R. S. et al., 30.3–418

Volcanic eruption–stratospheric temperature relationships
Sekihara, K. et al., 30.11–289

Volcanological studies
Furumoto, A. S. et al., 30.7–3

Vortex cloud patterns
Jensen, N. O. et al., 30.5–374

Vortex dynamics
Chen, Tai-Jen George et al., 30.5–214
Rao, G. V. et al., 30.1–283
Rotunno, R., 30.5–223

Vortex motion in fluids
Vautravers, J. et al., 30.9–220
Wippermann, F. K. et al., 30.5–191

Vortexes
Mukherjee, A. K. et al., 30.9–379

Vorticity
Harwood, R. S., 30.4–254

Vorticity analysis
Hayashi, Y., 30.10–184

Vorticity balance
Lau, Ngar-Cheung, 30.11–216

Vorticity development
Snow, J. T., 30.2–227

Vorticity distribution
Williams, R. G. et al., 30.1–258

Vorticity equations
Cho, Han-Ru et al., 30.5–222

Vorticity experiments
Rotunno, R., 30.5–223

Vorticity sources in thunderstorms
Elrick, J. R., 30.5–221

Vorticity transport
Hartjenstein, G. et al., 30.10–267

W

Wake turbulence
Eskridge, R. E. et al., 30.9–222; 30.9–223
Weber, F., 30.7–295

Wakes
Taylor, P. A., 30.11–201

Walker cell
Julian, P. R. et al., 30.1–264

WAMEX (West African Monsoon Experiment)
Global Atmospheric Research Programme, 30.1–7
Global Atmospheric Research Programme. Joint Organizing Committee, 30.8–380

Warm cloud rain formation
Isaac, G. A. et al., 30.11–347

Warm fog dissipation techniques
Kunkel, B. A., 30.4–161; 30.10–101

Warm frontal passages
Rottger, J., 30.5–229

Washout
Adamowicz, R. F., 30.5–401
Enger, L. et al., 30.10–115
Olson, M. P. et al., 30.11–204
Slinn, W. G. N. et al., 30.1–148

Washout of sulfur dioxide
Barrie, L. A., 30.1–155
Maul, P. R., 30.3–133

Washout processes by precipitation
Horváth, L., 30.4–415
Rodhe, H., 30.7–132

Waste disposal into sea
Hoffert, M. I. et al., 30.12–119

Waste disposal underground
Brown, P. M. et al., 30.11–495

Waste water disposal
Cassell, E. A. et al., 30.11–501

Waste water treatment
Dind, P. et al., 30.9–253

Water balance–agriculture relationships
Wynne, R., 30.5–358

Water balance analysis
Eagleson, P. S., 30.2–361; 30.2–362
Treter, U., 30.11–338

Water balance calculations
Hillaker, H. J., Jr. et al., 30.3–347
Sanderson, M. et al., 30.11–319

Wind shear effects on airplanes
Chen, T. Y. et al., 30.7–307
Frost, W. et al., 30.6–252

Wind shear effects on convective clouds
Chalon, J. P., 30.6–320
Dzhurayev, A. D. et al., 30.8–423

Wind shear effects on diffusivity
Šinek, N., 30.7–305
Ukeguchi, N. et al., 30.7–206

Wind shear effects on hail formation
Dzhurayev, A. D. et al., 30.8–423

Wind shear forecasting
Richwien, B. A., 30.10–80

Wind shear measurement techniques
Beran, D. W. et al., 30.8–382

Wind shear probes
Beran, D. W. et al., 30.8–382

Wind shear studies
Greene, G. E. et al., 30.8–383
Weber, F., 30.7–308

Wind shear theory of sporadic-E
Miller, K. L. et al., 30.1–226

Wind–snow effects
Kobayashi, S. et al., 30.7–292

Wind speed near the ground
Silversides, R. H., 30.1–368

Wind station networks
Tomlinson, A. I., 30.4–59

Wind storms
Morozowska, I., 30.3–325

Wind stress effects
Cane, M. A., 30.8–548; 30.8–549
Creegan, A. et al., 30.10–553
Frankignoul, C. et al., 30.4–359; 30.11–547
Khandekar, M. L., 30.11–522

Wind stress on sea surfaces
Hupfer, P., 30.8–385
Schmitt, K. F. et al., 30.3–339
Smith, S. D., 30.11–313

Wind stress on seawater
Shaw, P. T. et al., 30.4–364

Wind structure studies
Doviak, R. J. et al., 30.5–28

Wind–synoptic processes relationships
Willebrand, J., 30.2–329

Wind transport
Stokes, W. L., 30.3–335

Wind transport of dust
Schmidt, M. et al., 30.2–103
Vinogradov, B. V. et al., 30.2–106

Wind transport of insects
Spalding, J. B., 30.7–309

Wind transport of snow
Kobayashi, S. et al., 30.7–292

Wind tunnel experiments
Gillette, D., 30.3–334
Isyumov, N., 30.2–327
Mulhearn, P. J., 30.2–180

Zenith observations
Kaufman, Y. J., 30.10–225
Zodiacal light measurements
Mistrik, I., 30.3–477
Zonal circulation
White, A. A., 30.7–212
Zonal current perturbations
Keshavamurty, R. N. et al., 30.2–205
Zonal winds
Koshelkov, Yu. P., 30.9–406
Zooplankton distribution
Arinardi, O. H., 30.5–584
Zooplankton ecology
Arinardi, O. H., 30.5–584

CUMULATIVE GEOGRAPHIC INDEX

Vol. 30, Nos. 1–12 (Jan.–Dec. 1979)

(2) PHYSIOGRAPHICAL REGIONS

(213) Tropical Regions, 30.1–15, 205, 219, 355; 30.2–204, 378; 30.3–67, 225, 226, 229; 30.4–234, 487; 30.5–208; 30.8–241, 271, 281, 282, 289, 547, 548, 549; 30.9–229, 231; 30.10–154, 356; 30.12–142, 145, 178

(215) Hemispheres
(215–11) **Eastern Hemisphere**, 30.9–392
(215–13) **Southern Hemisphere**, 30.3–18; 30.4–101, 195; 30.5–140, 346; 30.6–72, 231; 30.9–406; 30.11–145, 283
(215–15) **Western Hemisphere**, 30.2–298
(215–17) **Northern Hemisphere**, 30.1–256, 468; 30.2–285, 387, 448; 30.3–219, 223, 415; 30.5–70, 71, 85, 294, 357; 30.6–95, 96, 98, 102, 232, 235; 30.7–349, 350, 391; 30.8–322; 30.9–102, 226, 227, 311, 317, 449; 30.10–79, 116, 197; 30.11–206, 207, 208, 209, 211, 238; 30.12–175, 323, 364, 538

(23) Mountains
(234) **Mountains of Europe**
(234.12) Pyrenees, 30.1–477
(234.2) Dauphine Alps
Grandes-Rousses Masif, 30.10–502
Sarennes Glacier, 30.10–501
(234.3) Alps, 30.1–297, 477; 30.3–64; 30.4–429; 30.5–427; 30.6–348; 30.9–464, 465, 476; 30.10–317, 504; 30.11–509, 510; 30.12–35, 62, 65, 186, 188, 199, 319, 325, 375
Glockner Region, 30.4–474
Gornergletscher, 30.9–475
Hintereisferner, 30.9–467
Mt. Blanc Massif, 30.10–501, 502
Rolle Pass, 30.12–315
Tennen Mts., 30.1–339
Zugspitze Observatory, 30.1–66
(234.42) Bieszczady Mts., 30.12–302
Carpathians, 30.2–229; 30.12–194, 195, 270
Gilau, 30.2–245
High Tatra, 30.12–187
Low Tatra
Bystra River Basin, 30.6–263
Sudetic Mts., 30.2–411; 30.6–86
Adlergebirge, 30.9–457
Tatras, 30.12–320
(234.65) Cairngorms, 30.8–420; 30.12–63
(234.8) Urals, 30.6–317
(235) **Mountains of Asia**, 30.10–505
Central Asia, 30.8–349
Gissar-Alay, 30.5–560
Pamirs, 30.5–560; 30.10–498
(235.21) Tien Shan, 30.8–331, 444
Gissar Valley, 30.8–423
Pskem River Basin, 30.1–551
(235.24) Himalayas, 30.8–102; 30.9–99; 30.12–528
Bethartoli Glacier, 30.7–512
Trans-Himalayas, 30.12–528
Western Ghats, 30.6–292, 30.9–452
(237) **Mountains of North America**
(237.1) Colorado Front Range, 30.4–296; 30.7–286
North Cascade Range, 30.12–291
Rocky Mts., 30.2–369; 30.4–165; 30.9–413
Sierra Nevada, 30.3–97; 30.9–459; 30.10–68
(237.2) Blue Ridge Mts., 30.2–359
Cowee Mts., 30.7–352
(238) **Mountains of South America**
(238.1) Andes, 30.3–420; 30.9–413
Quelccaya Ice Cap, 30.7–393
(239) **Mountains of Australia, Oceania, Arctic, and Antarctic Regions**
(239.4) Great Dividing Range, Australia, 30.1–285

(26) OCEANS, SEAS, AND INTERCONNECTIONS, 30.1–36; 30.3–202; 30.4–71; 30.5–298; 30.9–143; 30.12–36
(261) **Atlantic Ocean**, 30.1–490, 592; 30.2–554, 597; 30.3–559, 568; 30.4–581; 30.5–382; 30.6–164, 243, 543; 30.7–419, 548, 581; 30.8–162, 304, 327, 529, 545, 561, 563; 30.9–234, 235, 250, 578; 30.10–200, 202; 30.11–97, 98, 533, 562; 30.12–423, 579
(261:213) Tropical Atlantic, 30.1–65, 351; 30.2–43, 200, 310, 574; 30.3–306; 30.4–41, 409; 30.5–20, 101, 116, 328; 30.6–554; 30.7–39, 40, 41, 42, 226, 227, 561, 562, 570; 30.8–30, 319, 345, 346, 387; 30.9–17, 59, 60, 61, 62, 63, 242, 243, 342, 456, 593; 30.10–44; 30.11–53; 30.12–189, 213, 286
(261.1) North Atlantic, 30.1–577, 582; 30.2–218, 293, 329, 452, 584; 30.3–544, 562; 30.4–144, 261; 30.6–116, 246, 307, 527, 536, 558; 30.7–17, 207, 214, 391; 30.8–324, 328, 329, 524, 567, 586; 30.9–129, 328, 600; 30.11–96, 310, 571; 30.12–258, 536, 560, 593
(261.2) Northeast Atlantic, 30.1–464; 30.2–575; 30.3–137, 565, 595; 30.4–565, 573; 30.6–526; 30.8–11; 30.10–521, 559, 570, 588
Gulf of Cadiz, 30.10–564
(261.2–14) Southwest Atlantic, 30.1–594
(261.24) Baltic Sea, 30.1–353; 30.3–575, 576; 30.6–540; 30.8–385, 542; 30.9–577; 30.10–516, 547; 30.12–558
Puck Bay, 30.11–570
(261.242) Gulf of Bothnia, 30.6–524; 30.7–507; 30.8–538, 540, 555, 558; 30.10–6
(261.243) Gulf of Finland, 30.4–588; 30.7–507
Neva River Estuary, 30.12–548
(261.246) Southwest Baltic, 30.3–561
(261.247) Belts and Sund, 30.6–367
(261.248) Kattegat, 30.3–540
(261.26) North Sea, 30.1–373, 596; 30.2–34, 582; 30.3–540; 30.4–82, 570, 592, 593; 30.6–526, 576; 30.8–386; 30.9–233; 30.12–588
Ems River Estuary, 30.6–598
Rhine River Estuary, 30.6–598
Wadden Sea, 30.6–592
(261.262) German Bight and Frisian Island Waters, 30.11–71
(261.263) Skagerrak, 30.3–540; 30.5–581
(261.267) Strait of Dover, 30.3–338
(261.268) English Channel, 30.1–599; 30.3–236; 30.4–151; 30.11–582
(261.27) Irish Sea and Coastal Waters of West British Isles, 30.2–587; 30.4–597
(261.28) Bay of Biscay, 30.7–18
Gironde Estuary, 30.5–599; 30.12–553
(261.4) Northwest Atlantic, 30.1–382, 407; 30.2–552; 30.4–590; 30.6–513, 541, 562; 30.7–213, 530, 531, 557, 579, 590; 30.8–525, 526, 533; 30.9–352; 30.10–49, 83, 283, 548, 566, 567, 568, 575, 579; 30.11–313, 543, 550, 558, 559, 560; 30.12–562, 563
Cabot Strait, 30.3–555
Labrador Shelf, 30.2–449
Scotian Shelf, 30.6–586
(261.42) Davis Strait, 30.10–533
(261.43) Labrador Sea, 30.6–522
(261.44) Gulf of St. Lawrence, 30.2–109, 600; 30.8–599; 30.10–589, 594; 30.11–555, 567, 581
(261.45) Gulf of Maine, 30.3–564, 586; 30.7–571; 30.10–558, 579; 30.12–565
(261.452) Bay of Fundy, 30.3–564; 30.7–544
(261.46) Coastal Waters of East U.S., 30.1–16; 30.5–574; 30.6–288; 30.7–583; 30.8–521; 30.9–8; 30.10–519, 520, 552, 600; 30.11–306, 590; 30.12–232, 547, 568
Hudson Shelf Valley, 30.5–338
Massachusetts Bay, 30.8–578
New York Bight, 30.1–584; 30.12–574
Vineyard Sound, 30.4–564
(261.47) Chesapeake Bay, 30.2–569; 30.6–533; 30.8–590, 595; 30.12–382
(261.48) Coastal Waters of Southeast U.S., 30.2–572; 30.7–288; 30.8–531, 564, 596; 30.10–276, 565, 569, 573
North Inlet, 30.5–595
(261.5) South Atlantic, 30.7–550; 30.8–552; 30.10–523
(261.6) West and Southwest Atlantic, 30.4–355; 30.7–531; 30.9–7, 352, 573, 574, 576, 594; 30.11–564; 30.12–360, 576
(261.6–14) Southwest Atlantic, 30.10–560
(261.6–15) West Atlantic, 30.6–560
(261.62) Sargasso Sea, 30.2–555; 30.3–552; 30.8–585
(261.63) Bahama Sea, 30.4–598, 599
(261.638) Florida Strait, 30.8–569; 30.9–584
